Review Course for the California Specific Exam Generic Agenda Webinar - 2018

Have available the California Geology Study Manual, course notes, and tools including protractor, engineer's scale, straight edge or ruler, rolling ruler, calculator, stereonet, extra paper (including tracing paper), erasers, and soft lead and colored pencils. You also will find highlighters, post-its and notepaper to be helpful. You will need to have access to a computer that you have administrator privileges to so you can join the Webinar. More details on signing on and joining the class will be coming via email after the cut-off date, so make sure we have the correct email address. You are signed on using your email address.

Before the class, it is to your advantage to review the Study Manual and work as many problems as you can at the end of the chapters as this will allow you the opportunity to ask questions.

Introduction to the California Specific Exam

(exam preparation, strategy and format, exam topics, emphasis and reading list)

California Geology/Geomorphologic Provinces/Hydrogeology

(rocks & formations, economic, geologic history, watersheds, aquifers, water quality)

Geologic Hazards

(faults & earthquakes, landslides, other geologic hazards)

Laws, Regulations & Guidelines

Ethics
